THERMOCHIMICA ACTA, VOLUME 119 (1987)

SUBJECT INDEX

Absorbed dose,
a water calorimetric determination of absorbed dose to water (Roos) 81
Acetonitrile–ethanol–saturated hydrocarbon,
liquid–liquid equilibria for ternary acetonitrile–ethanol–saturated hydrocarbon and acetonitrile–1-propanol–saturated hydrocarbon mixtures (Nagata) 357
Acetonitrile–1-propanol–saturated hydrocarbon,
liquid–liquid equilibria for ternary acetonitrile–ethanol–saturated hydrocarbon and acetonitrile–1-propanol–saturated hydrocarbon mixtures (Nagata) 357
Acid-activated clay minerals,
thermal investigation of acid-activated clay minerals (Sarier, Güler) 293
Adiabatic methods,
adiabatic methods for the investigation of exothermic reactions (Grewer) 1
Adsorbed water films,
detection of adsorbed or condensed water films with the aid of thermal oscillations (Gast, Talebi) 37
Aluminium alloys,
the influence of zirconium on decomposition in high strength aluminium alloys (Lacom, Degischer) 211
Anatase,
reaction of strontium sulfate with anatase and rutile below and above the phase transition temperature of strontium sulfate (Tagawa, Igarashi) 347
Antibacterial efficiency,
Listeria monocytogenes — microcalorimetric investigations regarding the antibacterial efficiency of chemotherapeutics (Allerberger) 113
Artifical membrane systems,
investigations into the thermotropic phase behaviour of natural membranes extracted from Gram-negative bacteria and artificial membrane systems made from lipopolysaccharides and free lipid A (Brandenburg, Blume) 127

Balance calorimetry,
balance calorimetry (Riesen) 219

t-Butyl alcohol–water,
standard thermodynamics of transfer. V. The silver and silver salt electrodes in *t*-butyl alcohol–water mixtures at various temperatures (Dash, Samanta) 337

C80 calorimeter,
new experimental vessels for the C80 calorimeter (Benoist) 223
Caloric measurements,
computer-aided acquisition and processing of data for caloric measurements with isoperibol calorimeters (Kuessner) 59
Caloric quantities,
determination of caloric quantities of dilute liquid solutions (Wilhelm) 17
Chelate complexes,
thermochemical properties of the chelate complexes of some 3d-electron elements with 2,2,6,6-tetramethylheptane-3,5-dione. Part II. Complexes of nickel(II), copper(II) and zinc(II) (Giera, Kąołowicz) 311
Chemotherapeutics,
Listeria monocytogenes — microcalorimetric investigations regarding the antibacterial efficiency of chemotherapeutics (Allerberger) 113
Computer-determined kinetic parameters,
computer-determined kinetic parameters from TG curves. Part XX (Reich et al.) 383
Condensed water films,
detection of adsorbed or condensed water films with the aid of thermal oscillations (Gast, Talebi) 37
Copper(II) complexes,
thermal behaviour of copper(II), iron(II) and iron(III) complexes of 1-(2′-hydroxybenzyl)-(2′-hydroxyphenyl)-benzimidazole (Prakash et al.) 377
Copper(II) complexes,
thermochemical properties of the chelate complexes of some 3d-electron elements with 2,2,6,6-tetramethylheptane-3,5-dione. Part II. Complexes of nickel(II), copper(II) and zinc(II) (Giera, Kąkołowicz) 311
Coturnix coturnix japonica,
direct and indirect calorimetry of the resting

metabolism of Japanese quail (*Coturnix coturnix japonica*) (Schultze-Motel, Lamprecht) 157
$CuO–Cr_2O_3$ mixed oxides,
reduction reactivity of $CuO–Cr_2O_3$ mixed oxides with hydrogen and the effect of gamma pre-irradiation (Pospíšil) 261
ω-Cyclohexane fatty acids,
DSC studies of phospholipids containing iso-branched and ω-cyclohexane fatty acids (Blume et al.) 53

Deconvolution,
deconvolution of periodic heat signals by Fast Fourier Transform (Müller, Plesser) 189
Differential scanning calorimetry,
differential scanning calorimetry as a complementary tool in wood biodegradation studies (Reh et al.) 143
Dilute liquid solutions,
determination of caloric quantities of dilute liquid solutions (Wilhelm) 17
N,*N*-Dimethylaniline derivatives,
thermodynamics of electron transfer processes in liquid and gas phases. Part II. Correlations of electro-oxidation and ionization potentials with substituent constants for some *N*,*N*-dimethylaniline derivatives (Marrosu et al.) 273
Divalent metal ions,
thermodynamics, formation constants, spectrophotometry and infrared spectroscopy of complexes between some divalent metal ions and 3-hydrazino-6-phenylpyridazine and related ligands (El-Shetary et al.) 249

Exothermic reactions,
adiabatic methods for the investigation of exothermic reactions (Grewer) 1
Extended batch calorimetry,
extended batch calorimetry on periodic chemical reactions (Lamprecht et al.) 175

Fast fourier transform,
deconvolution of periodic heat signals by Fast Fourier Transform (Müller, Plesser) 189
Flash setting,
thermal monitoring of flash setting in Portland cement clinkers (Bhatty) 235
Free lipid A,
investigations into the thermotropic phase behaviour of natural membranes extracted from Gram-negative bacteria and artificial membrane systems made from lipopolysaccharides and free lipid A (Brandenburg, Blume) 127

GeI_4,
vapour pressure and sublimation enthalpy of GeI_4 (Ferro, Stranges) 373
Gram-negative bacteria,
investigations into the thermotropic phase behaviour of natural membranes extracted from Gram-negative bacteria and artificial membrane systems made from lipopolysaccharides and free lipid A (Brandenburg, Blume) 127

Heat defect of water,
a measurement of the heat defect of water caused by high energy electrons (Roos, Hohlfeld) 95
Heat pulse measurements,
heat pulse measurements of the specific heat of steels (Hanitzsch) 203
High energy electrons,
a measurement of the heat defect of water caused by high energy electrons (Roos, Hohlfeld) 95
3-Hydrazino-6-phenylpyridazine,
thermodynamics, formation constants, spectrophotometry and infrared spectroscopy of complexes between some divalent metal ions and 3-hydrazino-6-phenylpyridazine and related ligands (El-Shetary et al.) 249

Iron(II) complexes,
thermal behaviour of copper(II), iron(II) and iron(III) complexes of 1-(2′-hydroxybenzyl)-(2′-hydroxyphenyl)-benzimidazole (Prakash et al.) 377
Iron(III) complexes,
thermal behaviour of copper(II), iron(II) and iron(III) complexes of 1-(2′-hydroxybenzyl)-(2′-hydroxyphenyl)-benzimidazole (Prakash et al.) 377
Iso-branched fatty acids,
DSC studies of phospholipids containing iso-branched and ω-cyclohexane fatty acids (Blume et al.) 53

Japanese quail,
direct and indirect calorimetry of the resting metabolism of Japanese quail (*Coturnix coturnix japonica*) (Schultze-Motel, Lamprecht) 157

Lanthanide salicylato complexes,
solid state decomposition studies on metal salicylates. Thermal decomposition of some lanthanide salicylato complexes (Kokkonen et al.) 285
Left-handed helix formation,
energetics of left-handed helix formation of nucleic acids (Klump) 103
Light emission,
flow-microcalorimetric investigations on the relationship between heat production and light emission of *Photobacterium phosphoreum* (Hartung) 121
Lipopolysaccharides,
investigations into the thermotropic phase behaviour of natural membranes extracted from Gram-negative bacteria and artifical membrane systems made from lipopolysaccharides and free lipid A (Brandenburg, Blume) 127
Liquid crystal transitions,
calorimetric determination of enthalpy changes in octylcyanobiphenyl (8CB) liquid crystal transitions (Rojas et al.) 301
Liquid–liquid equilibria,
liquid–liquid equilibria for ternary acetonitrile–ethanol–saturated hydrocarbon and acetonitrile–1-propanol-saturated hydrocarbon mixtures (Nagata) 357
Listeria monocytogenes,
Listeria monocytogenes—microcalorimetric investigations regarding the antibacterial efficiency of chemotherapeutics (Allerberger) 113
Low temperature microcalorimetry,
recent progress in low temperature microcalorimetry (Gmelin, Brill) 35

Metal salicylates,
solid state decomposition studies on metal salicylates. Thermal decomposition of some lanthanide salicylato complexes (Kokkonen et al.) 285
Mycotypha africana,
microcalorimetric studies in *Mycotypha africana* (Brose et al.) 151

Natural membranes,
investigations into the thermotropic phase behaviour of natural membranes extracted from gram-negative bacteria and artificial membrane systems made from lipopolysaccharides and free lipid A (Brandenburg, Blume) 127
Nickel(II) complexes,
thermochemical properties of the chelate complexes of some 3d-electron elements with 2,2,6,6-tetramethylheptane-3,5-dione. Part II. Complexes of nickel(II), copper(II) and zinc(II) (Giera, Kąkołowicz) 311
Non-isothermal kinetic parameters,
comparison between a classical method and two new methods to evaluate non-isothermal kinetic parameters (Eftimie, Segal) 369
Nucleic acids,
energetics of left-handed helix formation of nucleic acids (Klump) 103

PbS,
analysis of the chemical reaction between $PbSO_4$ and PbS (Malinowski) 329
$PbSO_4$,
analysis of the chemical reaction between $PbSO_4$ and PbS (Malinowski) 329
PEEK,
the thermal analysis of PEEK (Wunderlich, Cheng) 231
Pentafluorotellurates,
study of the thermal decomposition of pentafluorotellurates of the alkali metals (Germain et al.) 243
Periodic chemical reactions,
extended batch calorimetry on periodic chemical reactions (Lamprecht et al.) 175
Periodic heat signals,
deconvolution of periodic heat signals by Fast Fourier Transform (Müller, Plesser) 189
Phospholipids,
DSC studies of phospholipids containing iso-branched and ω-cyclohexane fatty acids (Blume et al.) 53
Photobacterium phosphoreum,
flow-microcalorimetric investigations on the relationship between heat production and light emission of *Photobacterium phosphoreum* (Hartung) 121
Polyvinylacetate,
enthalpies of solution of polyvinylalcohol in water and polyvinylacetate in dioxane (Schneider, Heintz) 47
Polyvinylalcohol,
enthalpies of solution of polyvinylalcohol in water and polyvinylacetate in dioxane (Schneider, Heintz) 47
Portland cement clinkers,
thermal monitoring of flash setting in Portland cement clinkers (Bhatty) 235

Renewable resources,
application of differential scanning calorimetry (DSC) to characterization of components in renewable resources (Gaida, Münzing) 169
Rutile,
reaction of strontium sulfate with anatase and rutile below and above the phase transition temperature of strontium sulfate (Tagawa, Igarashi) 347

Sample base line,
a numerical method to construct the sample base line in DSC curves (Bandara) 233
Silver and silver salt electrodes,
standard thermodynamics of transfer. V. The silver and silver salt electrodes in *t*-butyl alcohol–water mixtures at various temperatures (Dash, Samanta) 337
Solid high polymers,
the computation of heat capacities of solid high polymers from vibrational spectra (Wunderlich, Bu) 225
Solid state decomposition,
solid state decomposition studies on metal salicylates. Thermal decomposition of some lanthanide salicylato complexes (Kokkonen et al.) 285
Specific heat of steels,
heat pulse measurements of the specific heat of steels (Hanitzsch) 203
Strontium sulfate,
reaction of strontium sulfate with anatase and rutile below and above the phase transition temperature of strontium sulfate (Tagawa, Igarashi) 347

2,2,6,6-Tetramethylheptane-3,5-dione,
thermochemical properties of the chelate complexes of some 3d-electron elements with 2,2,6,6-tetramethylheptane-3,5-dione. Part II. Complexes of nickel(II), copper(II) and zinc(II) (Giera, Kąkołowicz) 311
Thermal oscillations,
detection of adsorbed or condensed water films with the aid of thermal oscillations (Gast, Talebi) 37
Thermosetting aniline–formaldehyde resins,
studies on the thermal decomposition of thermosetting aniline–formaldehyde resins (Santhanalakshmi) 321
Thermotropic phase behaviour,
investigations into the thermotropic phase behaviour of natural membranes extracted from Gram-negative bacteria and artificial membrane systems made from lipopolysaccharides and free lipid A (Brandenburg, Blume) 127

Wood biodegradation,
differential scanning calorimetry as a complementary tool in wood biodegradation studies (Reh et al.) 143

Zinc(II) complexes,
thermochemical properties of the chelate complexes of some 3*d*-electron elements with 2,2,6,6-tetramethylheptane-3,5-dione. Part II. Complexes of nickel(II), copper(II) and zinc(II) (Giera, Kąkołowicz) 311
Zirconium,
the influence of zirconium on decomposition in high strength aluminium alloys (Lacom, Degischer) 211
